

## Remarks

1. These rugs are produced using the "face-to-face weaving technique". Two identical carpets - a bottom and a top carpet - are woven at the same time, and consequently the bottom carpet will be the mirror design of the top carpet. It means that 50% of a production will have the image as per the picture in the catalogue and 50% will have the mirror image. When effecting actual shipments to our clients this 50% / 50% ratio will more or less be respected, depending on the availability in our warehouse inventory.

A blue stylized letter 'B' logo inside a white square with a blue border.A blue stylized letter 'B' logo, which is a mirror image of the one on the left, inside a white square with a blue border.
